Projects

Education CRM | *NestJS | Node.js | TypeScript | PostgreSQL | Prisma | Docker | JWT Authentication | March, 2026*

I developed a real-world CRM system for the MK-Academy educational center using NestJS and TypeScript. The backend architecture was built with PostgreSQL and Prisma ORM, including authentication, role-based authorization, access and refresh tokens, validation, error handling, logging, and secure API structure. The project was fully containerized using Docker and designed to manage students, groups, courses, payments, and internal educational processes efficiently.

EduNest | *NestJS | Node.js | TypeScript | PostgreSQL | Prisma | JWT Authentication | January, 2026*

I developed the backend part of an online learning platform similar to MohirDev using NestJS and TypeScript. The system was designed for selling and managing online courses, including user authentication, role-based access control, course management, lesson structure, purchase system, and secure API architecture. The project also includes validation, error handling, JWT access and refresh tokens, and optimized database relationships using Prisma ORM and PostgreSQL.

VoltClaude | *Node.js | NestJS | Telegram Bot API | Claude Integration | February, 2026*

I developed a Telegram bot called VoltClaude that allows users to upload images and automatically store them through Claude integration. The bot processes uploaded files, uploads them to the cloud service, and returns a short accessible link back to the user. The project includes file handling, API integration, asynchronous processing, validation, and optimized response handling for fast user interaction.

Technical skills:

Node JS, Express JS, Nest JS, JavaScript, TypeScript, Python , C, PostgreSQL, MySQL, MongoDB, Mongoose

Soft skills:

Communication, Leadership, Adaptability, Problem solving.

Experience:

Assistant Teacher — Foundation Course

Najot Ta'lim | C Programming | Python | Algorithms | 2026 – Present

Worked as an Assistant Teacher in the Foundation course at Najot Ta'lim, helping students understand programming fundamentals, algorithms, and problem-solving concepts. Assisted students with practical tasks in C and Python, checked homework assignments, explained programming logic, and supported the learning process during lessons and practice sessions.

Education:

Najot Ta'lim, Tashkent – Full-stack bootcamp course.

June 2025 – present.

Languages

Uzbek - Native | English – Upper-Intermediate (B2) | Russian - Intermediate.

Certifications

IELTS 6 score
